## THE MONTHLY SCOOP

### SPOTLIGHT ON MANUFACTURING

According to the Aspen Institute: "After an era of marked decline, rural manufacturing is on the upswing. Local businesses and nonprofit innovators are re-shaping how manufacturing – and its higher quality jobs so important to family and community prosperity – can stabilize, grow and become a driver in their rural regions."

The Maker Movement has grown in recent years as a new generation of designers and entrepreneurs have used makerspaces to access equipment such as 3-D printers, laser engravers, and other new technologies to reinvigorate small-batch manufacturing. Trinidad State is Home to the Collaboratory makerspace. Visit [trinidadstate.edu/collaboratory](http://trinidadstate.edu/collaboratory) for current information such as open lab ours, upcoming workshops, and the equipment list.

Laser  
Cutting

Dremel  
Holder  
made  
on the  
3D  
printer

Weaving  
workshops
