

STOCK REPAIR
\$400 or 2 credit hours

This course will cover the repair of breaks and cracks on wood stocks. We will go over materials that can be used to make the repairs stronger. We'll cover glass bedding a rifle stock, both the action area and the barrel channel. If the stock is cracked or broken through the checkering we will go over touching up the checkering.

Bring your cracked or broken stocks to repair in class. (Try to have all the pieces)

Bob Campbell graduated with an AAS degree in Gunsmithing from Trinidad State College in 2009. He worked for the Williams Gun Sight Company as a Gunsmith from 2011 to 2019. In the Fall of 2019, he joined Trinidad State as a full time instructor teaching Stock Making, Conversions, and Metal Finishing.
