

## **Introduction to Gunsmithing**

**May 25-29, 2026**

**\$400 or 2 credit hours**

This course is an open lab design that allows students to bring their own projects to learn the basics of gunsmithing on. The course will cover operational theory, disassembly and assembly, proper use of hand tools and precision measuring instruments, and an introduction to basic bench work of the Gunsmithing trade. Consideration will be given to minor gun repair and the installation of firearm accessories. Students should bring some basic project to work on during lab times under the supervision of the instructor. If a student desires to learn a skill that they do not have a project for, they may contact the instructor and the school may be able to provide instructional aid. Any projects that require major machining will require the student to first take a basic and advanced machine course through TSC.

**Instructor: Ryan Newport**
